

Every Patient Deserves Quality Care

*Join us and call on
Providence Everett Medical Center
to put care first!*

As employees of Providence Everett Medical Center, we work every day to serve our patients and uphold the Mission of Providence through the core values of Respect, Compassion, Justice, Excellence and Stewardship. From your first phone call through your hospital visit, we work hard to ensure you and your family members have a great experience and receive excellent care at Providence.

You deserve the best care every step of the way, but Providence leadership needs to share that vision. Unfortunately, instead of being open to changes that would allow us to serve patients coming in every day, we find ourselves often short-staffed, working harder with less and losing valuable employees. We want to be able to recommend our hospital to our Community, our Families and our Friends, but we can only do that if Providence respects us and supports our ability to serve our patients fully.

**Contact Providence Health & Services
CEO Preston Simmons at**
