

Group Health Patients Deserve the Best Care.

WHY WON'T GROUP HEALTH INVEST IN KEEPING THE BEST STAFF?

As frontline staff we work hard to ensure our patients have a great experience at Group Health from their first call, to the time they check in, to their blood work, procedures and x-rays. We're proud our patients rely on us for their care and to explain procedures and provide guidance.

But Group Health Management needs to share in this vision. It's time to stop cuts to staffing, because every patient should have the staff it takes for their care. Harmful cuts to our benefits could make it difficult to care for our own families.

Group Health, honor your vision for quality and service and invest in the staff it takes to provide the best care.

Please add your name to this petition on the reverse side and authorize inclusion in a newspaper ad.

Placement of this petition in the local newspaper will help us explain to our patients and the community that our number one goal is their care and that can only happen when Group Health invests in their employees.
