

# Every Patient Deserves QUALITY CARE

## Join us and call on Group Health to put care first

We're proud to work for you at Group Health to provide the best care and services. From your first phone call or contact we help with your appointments, check you in for a visit, take your blood pressure, assist the provider with a procedure, draw your blood, take an x-ray, fill your prescriptions and make sure your billing is correct. **We work hard to ensure you have a great experience at GHC.**

You deserve the best care every step of the way, but Group Health executive leaders need to share that vision. We're deeply troubled Group Health administration wants to further reduce staffing levels, cut our retirement benefits and our sick leave and break other promises they've made to us. These setbacks mean you could see fewer of us or have to wait longer for the care you need, and could make it hard to keep the best staff.

**Together we can make  
sure every GHC patient  
receives quality care.**
